### GENERAL INSTRUCTIONS

Read all instructions carefully.

Lay out, cut out and fold bottom of box. Fold the lap seams at end of box and then the right angle bends which form the bottom & sides.

Lay out and cut out ends of box and tray brackets. Fold tray brackets at 90 degree angle and attach to ends by riveting or spot welding.

Lay out, cut out and fold top & front access door.

Assemble the box by spot welding or riveting the ends to the bottom and the continuous hinges to the back and top and the front and access door.

Lay out and cut out stock for tray. Fold tray and spot weld or rivet ends to bottom and sides. Use 1/2" wood dowel rod for tray handle. Scraps ok too.

Drill the remaining holes necessary for attaching the hardware and fasten with rivets.
